

## Ohio Correctional Center Saves 1 to 2 Weeks Per Examinee by Screening with EyeDetect

*“EyeDetect is very easy to administer and very convenient time-wise.”*

*Peg Romine,  
Multi-County  
Correctional  
Center Captain*

### BACKGROUND

The [Multi-County Correctional Center](#), established in 1999, is a full-service county jail in Marion, Ohio. Under the direction of the Executive Director, Multi-County is staffed by 38 Corrections Officers, 3 Sergeants, 4 Lieutenants, 1 Captain,

and 10 full-time support staff. Prior to implementing EyeDetect, if the jail wanted to screen job candidates or employees with another lie detection method, it was inconvenient because it was off site and difficult to schedule.

### EYEDETECT IMPLEMENTED

Multi-County was introduced to EyeDetect by the Marion County Sheriff’s Office in Nov. 2018. The jail decided to implement EyeDetect because they not only found the technology cost-effective and convenient (because it was on-site), but also because the training was easy and practical.

### RESULTS

EyeDetect now saves this correctional center 1 to 2 weeks of screening time per job applicant over its previous screening methods. In addition, the agency feels by implementing EyeDetect, they’re more confident they’ve hired an honest, trustworthy person. Captain Peg Romine added, “EyeDetect is very easy to administer and very convenient time-wise.”
