Keep a Holy House

Get to the bottom of potential clergy sex-abuse scandals quickly with a 15-minute lie detector test.

EyeDetect®
The eyes don't lie®

Protect Your Worshippers

Sadly, many people across the U.S. have come forward to share their own stories of abuse suffered at the hands of clergy.

Churches are expected to be a sanctuary from the evils of the world. But what can be done to ensure that sexual misconduct never happens?

Shine the Light on Truth

If an accusation is made, a 15-minute EyeDetect lie detector test can expose any lies to receive forthright answers immediately — whether it be those accused or the accuser.

EyeDetect can help quickly investigate any scandal that could ruin your good name in the community, including:

- Sexual misconduct
- Bribery
- Episcopal negligence
- Clerical privilege

You can also use it to screen new clergy during the hiring process. It accurately measures the truthfulness about an applicant's past drug history, criminal behavior (whether caught or not), and accuracy when completing a job application, or any other critical issue of concern.

Best of all, EyeDetect never tires or can be influenced. It's computer-based and 100% unbiased. That means it will never discriminate based on gender, race or color.

What is EyeDetect?

Deceptive thoughts cause an increase in cognitive load, which cause involuntary changes in the eyes. EyeDetect uses an eye-tracking camera to measure these changes and then calculates a credibility score within 5 minutes at 87% accuracy.

EyeDetect: An Answer to Prayer

Dishonest Clergy – Quickly identify clergy that are deceptive.

Honest Clergy – Focus on candidates with no indicators of deception.

High Accuracy - Classifies those tested as truthful or deceptive with a 87% accuracy for investigative tests.

Unbiased – EyeDetect is automated and will not show bias or discrimination.

Fast – Investigative tests take 15 minutes. Screening tests take 30 minutes. Results are ready in less than 5 minutes.

Nonintrusive – No uncomfortable cables or sensors are attached to the person tested.

Simple to Use - In about 6 hours, you can learn how to administer tests and interpret results.

Efficient - Administer up to 36 tests a day with one examiner.

Portable – EyeDetect instruments are portable and can easily be moved to various locations.

How EyeDetect Works

1. Participant takes a 15- to 30-minute true/false or yes/no test.
2. Data are captured, encrypted and uploaded to a secure web server.
3. Proprietary algorithms provide a credible or deceptive score in less than 5 minutes.

EyeDetect Station Includes:

- Computer, monitor, mouse and keyboard
- Eye-tracking camera
- Library of custom tests for religious organizations
- Chin rest
- Technical support (during business hours)
- Free software updates

CNN tech

"The technology, called EyeDetect, is gaining popularity as a more affordable, less-biased version of a polygraph exam."
– CNN Tech (10.04.2017)

"EyeDetect is the single, most-promising lie detection technology to come along in 100 years."

– Don Krapohl
Former CIA polygraph examiner
Former NCCA deputy director
